NON-FINAL OFFICE ACTION

Information Disclosure Statement

1. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered. Listing of the references in the specification can be found in paragraph [0003]. References cited in the parent application must also be submitted on a proper information disclosure statement.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11 of U.S. Patent No. 6,638,590 in view of either US Patent No. 5,662,974 to Andrenacci or US Patent No.

4,389,270 to McClintock. Although the claims are not identical, the claims of the present invention are broader than the patented claims since the present claims do not specify the amounts by weight as required by the claims of the parent application. All presently claimed features have already been patented in the US Patent 6,638,590, except for the limitation of claim 8 requiring an anti-oxidant. Inclusion of an anti-oxidant, however, is notoriously well-known in the art, as evidenced by US Patent 5,662,974 to Andrenacci (col. 3, lines 61-67) or US Patent 4,389,270 to McClintock (col. 7, lines 27-31). It would have been obvious to include an anti-oxidant based on the ultimate intended use of the product, as shown by Andrenacci or McClintock.
